Santa Cruz METRO's
Bus Stop Master Plan

METRO is developing a **Bus Stop Master Plan** to improve bus stops across Santa Cruz County. The Plan will assess current bus stop conditions, identify high-priority improvements, and help guide future investments throughout METRO's service area.

The Plan will focus on what makes a bus stop work well for riders, with particular attention to communities that face greater transportation barriers. This includes how people **get to and from the bus stop, wait for the bus, and board.** The Plan will also consider **safety, accessibility, comfort, connections to walking and biking, and bus stop amenities like seating and lighting.** The result will be updated bus stop guidelines to help METRO plan future bus stops, service, and operations improvements.

Take the Rider Survey and Share Your Thoughts With Us!

If you ride METRO, tell us about your experience. What matters most to you at a bus stop? What's working well? What could be improved?

Scan me!

Your feedback will help identify bus stop improvements and priorities across the METRO service area.
